

Data Migration

Fast & Flexible

Data Migration with TelTape/390

Copy tape volumes quickly to new storage technologies:

- Virtual Tape
- High Capacity Tapes

TelTape/390 is a tape utility program product for OS/390.

High value-added tape to tape copying saves you conversion setup and processing time.

The audit trail is your peace of mind.

Fast

- Selection criteria and scoreboard dataset: Avoid extra and duplicated work
- Automatic deferral of off-site and "manual" volumes
- Minimal JCL: uses dynamic allocation
- Copy by block, not by record
- Real-time Tape Management & System Catalog updates

Flexible

- Built-in selection criteria
- Generate volume serial sequences, or specify volume serials
- Reports identify candidate, off-site, and out-of-library volumes
- Includes additional commands to map or check tape contents

Integrity

- Retain tape management attributes
- Process multi-volume sets, empty files, large block sizes
- Extensive audit trail, and spreadsheet results
- Scoreboard dataset: easy lookup of volser mapping & statistics

Interfaces

- Tape Management
- System Catalogs
- STK HSC
- Spreadsheet
- ISPF
